

BS5837 Tree Protection Plan (TPP)

Tree Precautionary Zone - (TPZ)

"The next step in land development around trees."

**Construction
Exclusion
Zone**

A BS5837 Arboricultural Tree Protection Plan (TPP) shows retained trees based on the Arboricultural impact assessment (AIA). It shows the protection methods required during the construction phase.

This could include Tree Protective Fencing (TPF) locations, Tree Precautionary Zones (TPZ) and Construction exclusion zones (CEZ) as well as offering alternative construction methods where required to safeguard the retained trees.

Top tip from our surveyors:

"Often we find that Tree Protection Fencing, Construction Exclusion Zones and Tree Precautionary Zones are often a planning condition if these are not adhered to onsite it may result in a stop notice - costing money and time"
